UNISWAP FINANCE (UNFI) WHITEPAPER VERSION 2.0

PREFACE

Dear Uniswap Finance Community,

Cryptocurrencies, which first appeared in 2009 with Bitcoin, have gradually started to take an important place in our lives. Using a trust-based technology behind it, which we call Blockchain, cryptocurrencies continue to be used to replace tangible pieces of paper called cash. Today, thousands of cryptocurrencies are being developed and continue to exist using this technology. Cryptocurrencies, which are continuing to evolve day by day, have been divided into two parts over time, Coin and Token. As a term, coins are self-contained structures that use their own networks. Tokens, on the other hand, emerged as concepts that progressed on smart contracts. Today, assets such as Bitcoin and Ethereum are considered as coins, while protocols such as Uniswap Finance can be exemplified as smart contracts. The increasing number of coins/tokens every day clearly shows that this technology will become even more important in the future. Of course, as the number of users increases, "trust" becomes an important issue in this sector, as in every other sector. While investing in these structures that use a "trust-based" technology, it is very important that you examine the projects well. Until this date, we have all seen and continue to see fraudulent news in various social media. In this regard, our valuable community, we kindly ask you to be careful in your investments.

Best Regards

Uniswap Finance Team

RESPECT TO OUR COMMUNITY,GOING TOGETHER WITH US

CONTENTS

LOGO

What is Uniswap Finance?

Uniswap Finance is a BEP20 'token created on the Binance smart chain. It provides easy usage with low fee fees in the BSC network. Together with its reliable mediators, it enables fast and efficient trading by eliminating unnecessary rental methods.

Our Mission

Our mission is to become a global brand, to ensure the right ownership together with our partners and to provide the highest security works of our operations.

Our Vision

Our vision is to make a simple and understandable production all over the world in a way that is common to this situation that spreads so that money can be used freely and in more widespread areas, to accompany people to adapt to this coordination and improve people's lives significantly. Also, our vision is to ensure that people reach the welfare level.

Project

PROJECT Our project will consist of contents about the entire Blockchain and Cryptocurrency world on the internet. Our goal is to develop a secure mobile application that will accurately introduce and explain Blockchain and the Crypto Money world to people. This application will contain News, Events, Blog and Forum sections. In this way, people will be able to follow the Blockchain and Cryptocurrency world up-to-date and accurately. Within the existing application, people will be informed about the tokens that are or will be created in the market, thanks to advertisements and comments. At the same time, it will gather this platform divided into different social media into a single application.

About Token

Token Information

➡️ Name: Uniswap Finanace

➡️ Symbol: UNFI

➡️ Decimal: 18

➡️ Total Supply: 1.000.000

➡️ Token Address: 0x84f17c03c31b1d1f51e94780faa02f51493940ea (BEP20)

Project : 1st Quarter of 2022

SUMMARY

Uniswap Finance (UNFI) was developed in Q3 2020 as a smart contract on the Binance Smart Chain(BSC) network. Its popularity and the cheapness of its transactions on its network were important factors in Uniswap Finance Team's selection of the BSC network.

After developing the smart contract to create the team community, Uniswap Finance took its place in social media such as Reddit, Telegram, Twitter, Facebook and Instagram, especially the Website. In order to grow and develop these communities, Uniswap Finance carried out its First Bounty & Airdrop in the 3rd quarter of 2020.

As a result of Bounty&Airdrop, approximately 3k+ holders and communities were reached in 3 months.

During these developments, Uniswap Finance, which entered the Swap Exchange in the 4th quarter of 2020, took its place on the Pancakeswap Exchange.

Subsequently, our project, which attracted attention, was listed by the Hotbit exchange in the first quarter of 2021. With our entry to the Hotbit exchange, the number of our community has grown.

After these developments, Uniswap Finance, Which attracted the attention of large investors in the 2nd quarter of 2021, increased in price.

Our project, which once again attracted attention, was listed on the Probit Exchange in the 2nd quarter of 2021. With our introduction to the Probit Exchange, the number of our community has increased.

Our project, which continued to grow after its entry into the Probit Exchange, continued to rise by being listed on the Bithumb Global Exchange in the 2nd quarter of 2021.

At the same time, our project met the CoinMarketCap listing requirements and was listed.

As a result of the requests the team renewed its website at the beginning of the third quarter of 2021.

In the third quarter of 2021, Uniswap Finance organized the 2nd Airdrop & Bounty campaign in order to grow its community in line with the requests.

During these developments, Uniswap Finance terminated its agreement with the software team due to the software team's failure to deliver the project on time and not completing the application.

The Airdrop & Bounty campaign was terminated in the third quarter of 2021. As a result, our community has reached 40k+.

Our project, which grows its community every day, has created special communities for Bangladesh, Azerbaijan, Turkey, India, Indonesia and Arab investors.

Total supply was decreased from 10M to 1M.

The project was not completed on time by the software team. Therefore, Uniswap Finance team took the management of the project completely and the team under the responsibility of the founders was gathered. The project is aimed to be published in the 1st quarter of 2022, at the latest.

Epilogue

In the world that is in the transition to a new system, recently, the importance of Cryptocurrency and Blockchain is increasing rapidly. With the emergence of blockchain technology, we provide you safe and fast service with our experienced team who follow this technology up to date. In the Cryptocurrency World, where "Security and Reliability" are important, we have identified these two fundamental ideas as our main purpose and we are moving forward with that purpose. With the mobile application we will create for the Blockchain and Cryptocurrency world, we will provide security and reliability to all people who want to learn about these technologies or/and who want to follow upto-date news about Cryptocurrency and Blockchain World.

As we say in our slogan "We Will Grow Together!".

Best Regards.
